Leave concerns
Human Resource Management Office, LGU Alicia

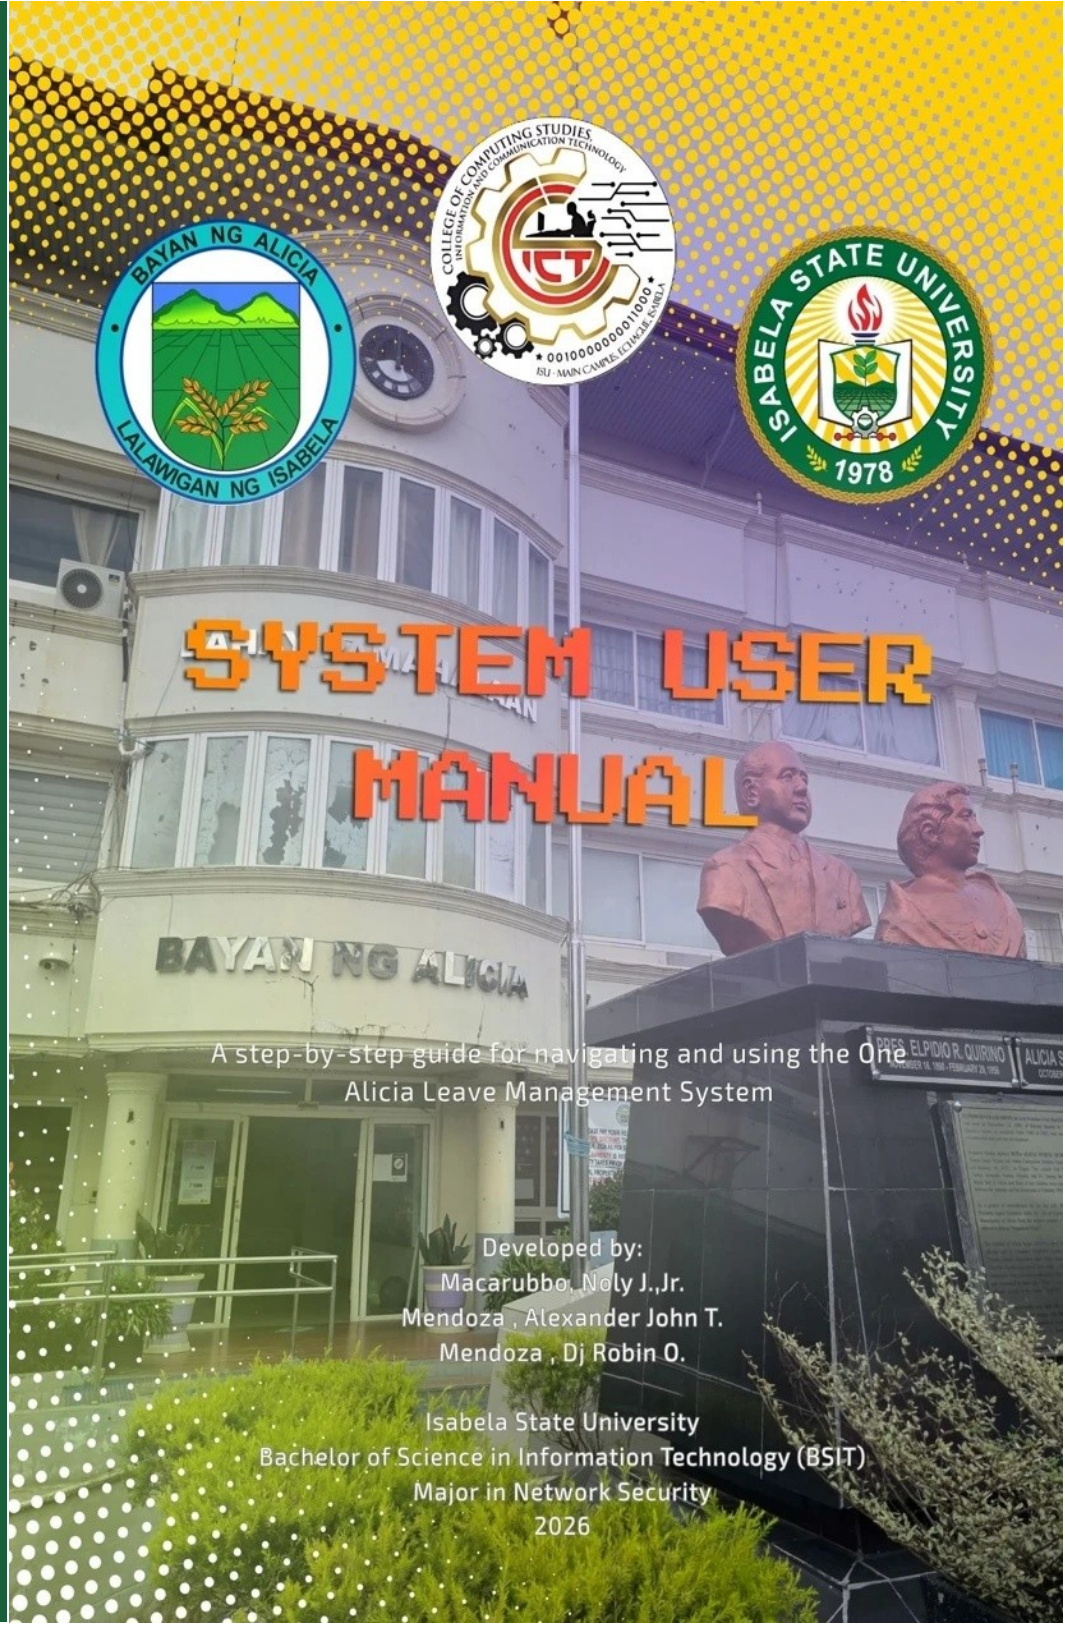

Accounts and system issues
The LMS System Administrator

DEVELOPED BY

Macarubbo, Noly J., Jr.
Mendoza, Alexander John T.
Mendoza, Dj Robin O.

Isabela State University – Echague Campus
College of Computing Studies, Information and Communication Technology

For use by authorized personnel of the Local Government Unit of Alicia, on the LGU local network only.

START HERE

About This Guide

This booklet shows authorized personnel of the Local Government Unit of Alicia how to use the **Cybersecurity Integrated Digital Leave Management System With Real-Time Intrusion Alerts** (LMS).

It follows the system as it is installed on the LGU local network. Every task is a two-page spread: the screen on the left page, and what each marked part does on the right page.

How to read the pictures

1 A green number marks a part of the screen. The same number on the facing page says what that part does.

A A letter labels each screen when a spread shows more than one.

Who should read what

If you are…	Read
Every user	Start Here, Signing In, Finding Your Way Around, Keeping Your Account Safe, the Policy (Part 20)
Employee	Parts 07 to 09
Department Head	Part 10
HR	Parts 11 to 14
Municipal Mayor	Part 14
System Administrator	Parts 15 to 18
IT staff installing it	Parts 22 to 29

NOTE Leave is approved by **HR in a single step**. The Department Head is informed and may record a recommendation; the Municipal Mayor oversees all leave.

INSTALLATION · IT Part 29

Updates, Backups and Problems

Updating the system

1. Back up first: `php artisan lms:backup`
2. Build a new package on the development PC (Step 1).
3. Click **Stop**, then unzip the new package over the old folder. Settings, certificate, logs and uploads are kept.
4. Run `php artisan migrate --force`, then click **Start**.

Backups

Backups are saved in `storage\app\backups`. Copy them off the server regularly. To restore, unzip one, import its `.sql` file in phpMyAdmin, and copy its `documents` folder back to `storage\app\private\leave-documents`.

Installation problems

Problem	Fix
“PHP was not found on your PATH”	Add `C:\xampp\php` to the Windows PATH and reopen Command Prompt.
MySQL will not start	Another program is using port 3306. Stop it, then start MySQL again.
“could not find driver”	In `C:\xampp\php\php.ini`, remove the `;` before `extension=pdo_mysql`, then restart.
Certificate warning	Run `connect-client.bat` (or `trust-cert.bat`) as administrator on that PC.
“Device not authorized”	Register the PC under **Authorized Devices**.

Automatic Jobs and First Sign-in

STEP 9 Schedule the automatic jobs *server*

In **Windows Task Scheduler**, create a task that runs every minute, whether or not anyone is signed in:

```
php artisan schedule:run
```

```
Start in:  C:\xampp\htdocs\lms
```

Runs	Job
1st of the month, 00:05	Adds the monthly leave credits
Every 5 minutes	Lifts expired IP and account blocks
Every hour	Deletes used and expired sign-in codes
Daily, 01:00	Backs up the database and documents

> IMPORTANT `start.bat` does **not** run these jobs. Without the task, monthly credits are never added.

STEP 10 First sign-in *server*

1. Sign in as `superadmin` with the starting password, enter the emailed code, and choose a new password.
2. Under **Authorized Devices**, register each office PC (IP address, hostname, MAC address).
3. Under **System Settings**, turn on **Only authorized devices may access the system**.
4. Under **Users**, create the accounts and give each its role.

START HERE Part 1

System Overview

The LMS replaces the paper leave process of LGU Alicia. Employees file CSC Form No. 6 on screen, HR decides, credits update automatically, and the system watches for attacks while it works.

Digital CSC Form No. 6
Fill in and submit leave on screen.

Automatic computation
Working days and credits are counted for you.

Single-step HR decision
Approve, return or disapprove, with remarks.

Tracking & notifications
A timeline and an alert on every change.

Printable form
Legal, Folio, A4 or Letter paper.

Reports
Leave, office and security reports, PDF or Excel.

Two-step sign-in
Password plus a 6-digit code by email.

Role-based access
Five roles; each sees only its own pages.

Audit trail
Sign-ins and important actions are recorded.

Intrusion detection
Suspicious requests are blocked and reported in real time.

INSTALLATION · IT Part 27

Connect the Office PCs

STEP 8 Connect each office PC *each office PC*

1. On the **server**, run `ipconfig` and note the **IPv4 Address**.
2. Copy the server's `deploy` folder to a USB drive, with `deploy\certs\lms.crt` inside it. Leave `lms.key` behind.
3. On the office PC, right-click `deploy\connect-client.bat` and choose **Run as administrator**.
4. Type the server's IPv4 address when asked. The script points the name at the server, trusts the certificate and tests the connection.

```
deploy\connect-client.bat <server IPv4 address>
```

IMPORTANT `lms.crt` is the public certificate and safe to copy. `lms.key` is the private key: it must **never** leave the server.

Phones and tablets

- Ask IT to add one **DNS record** on the office router: `onealicialms.lan` → the server's address.
- Install `lms.crt` on the device as a **CA certificate**. On iPhone, also switch it on under About → Certificate Trust Settings.

TIP If a PC still cannot connect, run `deploy\check-lan.bat` on the server as administrator. It changes nothing; it reports what is blocking the connection.

INSTALLATION · IT Part 26

Turn On HTTPS and Start

STEP 6 Run the HTTPS setup *server, as administrator*

Right-click `deploy\setup-https.bat` and choose **Run as administrator**. It:

- sets the address to `https://onealicialms.lan`;
- turns on Apache's HTTPS modules and writes the site settings for this PC's folder and network;
- makes this office's security certificate;
- opens Windows Firewall for the local network only;
- adds the name to this PC's hosts file.

Every file it changes is backed up first, and it is safe to run twice.

> IMPORTANT Set the server's network to **Private** under Settings → Network & Internet. On a Public network the firewall rules do not apply and office PCs cannot connect.

STEP 7 Desktop icons and first start *server*

1. Run `deploy\make-shortcuts.bat`. Two icons with the municipal seal appear: **LGU Alicia LMS – Start** and **– Stop**.
2. Double-click **Start**. It starts MySQL, the background worker and Apache, then opens the browser.

START HERE Part 2

How Leave Moves

Every application follows the same path. HR makes the only decision.

1. **Employee files**
   The application is Pending.
2. **Department Head is notified**
   May record a Box 7.B recommendation. It does not decide.
3. **HR decides**
   Approve, Return for revision, or Disapprove.
4. **Employee is notified**
   Credits are deducted when a deductible leave is approved.

Leave status

Status	Meaning	Can cancel?
Pending	Submitted, waiting for HR.	Yes
Returned	Sent back by HR for revision.	Yes
Approved	Approved by HR; credits deducted if deductible.	No
Disapproved	Disapproved by HR, with the reason.	No
Cancelled	Withdrawn by the employee.	No

START HERE Part 3

User Roles

Every account has one of five roles. The role decides which menu pages you see and what you may do.

Employee *Files and tracks own leave.*

Apply for leave, track status, cancel, download CSC Form No. 6, view leave credits.

Department Head *Is informed of leave filed in own office.*

Record a Box 7.B recommendation, follow office leave, office reports.

HR *Processes and decides all leave.*

Approve, return or disapprove; manage credits, leave types, holidays and offices; reports.

Municipal Mayor *Oversees leave across the LGU.*

View all applications and leave reports; named on the printed form.

System Administrator *Manages accounts and security.*

Users and roles, Security Dashboard, intrusion logs, blocked IPs, backups, settings.

INSTALLATION · IT Part 25

Tables and Starting Data

STEP 5 Create the tables *server*

Still inside `C:\xampp\htdocs\lms`, run one line at a time:

```
php artisan migrate --force
php artisan db:seed --force
php artisan storage:link
```

What this creates

- The **five roles** and their permissions.
- The **CSC leave types** and their rules.
- The **Philippine holidays** used to count working days.
- The **default settings**, including two-step sign-in.
- The **LGU offices** and positions.
- One **System Administrator** account, username `superadmin`, with the starting password from `.env`.

NOTE The administrator must choose a new password at the first sign-in. The package contains no demo accounts or sample leave.

TIP `storage:link` makes uploaded documents reachable. If attachments fail to open later, run it again.

Database and Settings

STEP 3 Create the database *server*

1. Open `http://localhost/phpmyadmin` in the browser.
2. Click **New**, type the name `lms_alicia` and choose `utf8mb4_unicode_ci`.
3. Click **Create**.

STEP 4 Create the settings file *server*

In Command Prompt, inside `C:\xampp\htdocs\lms`:

```
copy .env.example .env
php artisan key:generate
```

Open `.env` in **Notepad** and fill in three things:

1. The **database password** of the MySQL account.
2. The **mail server** details, from the LGU IT office.
3. A strong **starting password** for the System Administrator account.

> **IMPORTANT** `.env` holds the system's passwords and encryption key. Keep it on the server only: never email it, print it or copy it to another PC.

Before You Start

You will need

- A computer connected to the **LGU network**.
- **Google Chrome**, **Microsoft Edge** or **Mozilla Firefox**.
- Your **account**: email or username and a first-time password, given by the System Administrator.
- Access to your **email**, where the sign-in codes arrive.

Opening the system

1. Connect to the LGU network.
2. Open your web browser.
3. Type the address given by the System Administrator and press **Enter**.
4. The **Welcome back** sign-in page appears.

Your first sign-in

New accounts, and accounts whose password was reset, must set a new password first. After the one-time code, the **Change password** page opens by itself: type the first-time password, then your new password twice, and click **Update password**.

> **TIP** A new password needs at least **12 characters**, upper- and lowercase letters, a number and a symbol, and must differ from the current one.

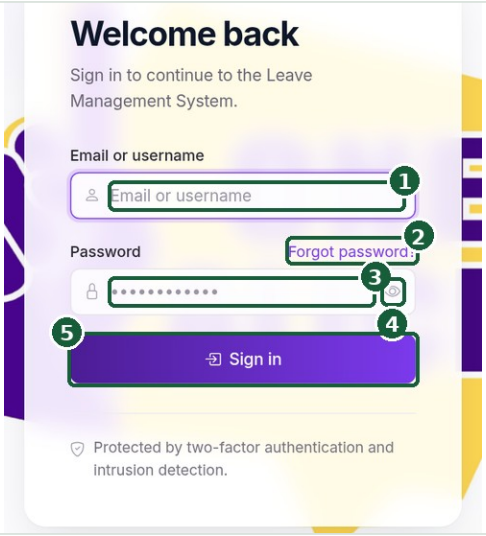

> **NOTE** If you see **"Device not authorized"** or **"Access blocked"**, contact the System Administrator. See Troubleshooting.

ALL USERS Part 5

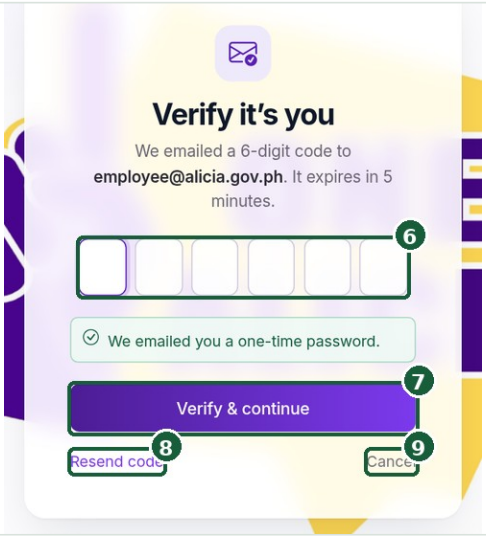

Signing In

Every sign-in has two steps: your password, then a one-time code sent to your email.

A Sign in

B Enter the one-time code

INSTALLATION · IT Part 23

Build and Copy the Package

STEP 1 Build the server package *development PC*

1. Open the project folder in **Command Prompt**.
2. Run the packaging script:

```
deploy\package-server.bat
```

3. It creates `dist\lms-server-YYYYMMDD-HHMM.zip`. Copy the ZIP to a USB drive.

> NOTE The package holds only what the server needs. It leaves out tests, developer files and demo data, and **never** carries your own settings file, certificate key, logs or uploaded files.

STEP 2 Install XAMPP and unzip *server*

1. Install **XAMPP** to `C:\xampp` (the default).
2. Unzip the package and move the `lms-server-…` folder to `C:\xampp\htdocs\lms`.
3. Open **XAMPP Control Panel** and click **Start** next to **MySQL**.
4. Add `C:\xampp\php` to the Windows **PATH** so the `php` command works in Command Prompt.

INSTALLATION · IT | Part 22

Installation Guide

For the **System Administrator or IT staff** who set the system up on the LGU server. Everyday users can skip this section.

1. **Development PC** Build the server package. The only step that needs internet.
2. **Server** Install XAMPP, unzip the package, create the database, turn on HTTPS.
3. **Office PCs** Point each one at the server and trust its certificate.
4. **First sign-in** Secure the administrator account, register devices, add users.

What you need

Machine	Needs
Development PC	The project, **Git**, **Composer 2**, and internet once to download the PHP libraries.
Server	A Windows PC on the LGU network with **XAMPP** (Apache, MySQL, **PHP 8.2.12** or newer, the same version as the development PC), a Windows administrator account, and a **fixed IP address**.
Office PCs	Chrome, Edge or Firefox, and a Windows administrator account once.
Network	An email (SMTP) server on the LAN for sign-in codes and notifications.

TIP Ask for a **DHCP reservation** on the router so the server keeps the same address. If it changes, every office PC loses the system until it is reconnected.

05 Signing In

WHAT EACH NUMBER MEANS

A Sign in

1. Your registered email address or username.
2. Forgot password? emails you a reset link.
3. Your password.
4. Show or hide the password.
5. Click Sign in.

B Enter the one-time code

6. The 6-digit code sent to your email. It works once and expires after 5 minutes.
7. Click Verify & continue.
8. Resend code if it expired or did not arrive.
9. Cancel goes back to the sign-in page.

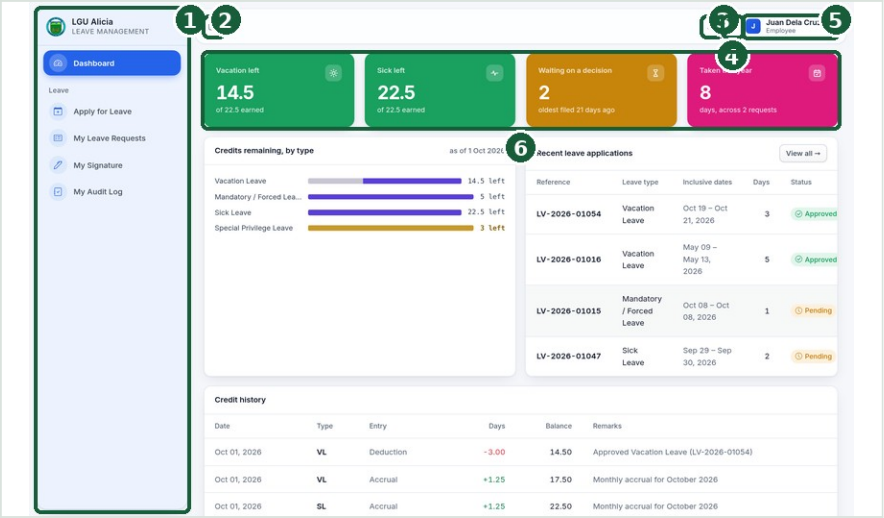

TIP Three wrong passwords block the account for 24 hours. After two failures, use Forgot password? instead.

ALL USERS Part 6

Finding Your Way Around

Every page has the same frame. The menu on the left shows only the pages your role may open.

A Parts of the screen

ALL USERS Part 21

Troubleshooting (continued)

Filing leave

Message or problem	What to do
Form will not submit	Fix every field listed in the red summary at the top of the form.
“Choose the type of leave …”	Select a **Leave type** in Step 2.
“Insufficient … credits”	File fewer days or another leave type. Ask HR if the balance looks wrong.
Attachment refused	Use PDF, JPG or PNG, 5 MB or smaller.
Office, position or salary is wrong	Ask HR or the System Administrator to update your employee record.
Wrong dates on a Pending application	There is no edit. Cancel it and file a new one.
Working days look wrong	A holiday may be missing from the calendar. Inform HR.
Application was Returned	Read HR’s comments, then fix what they ask or cancel and file again.

HELP Still stuck? Leave questions go to the **HR Office**. Account and sign-in problems go to the **System Administrator**.

ALL USERS Part 21

Troubleshooting

Find the message you see, then do what the right-hand column says.

Signing in

Message or problem	What to do
“Invalid password. N attempt(s) remaining”	Check Caps Lock and retype. After two failures, use **Forgot password?**
“This account is blocked until …”	Locked after 3 wrong passwords. Wait until the time shown, or ask the System Administrator to unblock it.
“This account is deactivated.”	Ask the System Administrator to activate it.
“Invalid or expired code.”	Codes expire after 5 minutes. Click **Resend code** and use the newest one.
No code arrived	Check the spam folder, wait a minute and click **Resend code**. Then contact the System Administrator.
“Access blocked” page	Your computer’s address was blocked after suspicious activity. Contact the System Administrator.
“Device not authorized” page	Ask the System Administrator to register your computer.
Signed out without warning	Sessions end after 30 minutes without activity. Sign in again.

06 Finding Your Way Around

WHAT EACH NUMBER MEANS

A Parts of the screen

1. The menu, limited to your role.
2. Hides or shows the menu.
3. Notifications about your applications.
4. Light or dark mode.
5. Your name and role. Opens Change password and Sign out.
6. Your leave credits, pending applications and days taken this year.

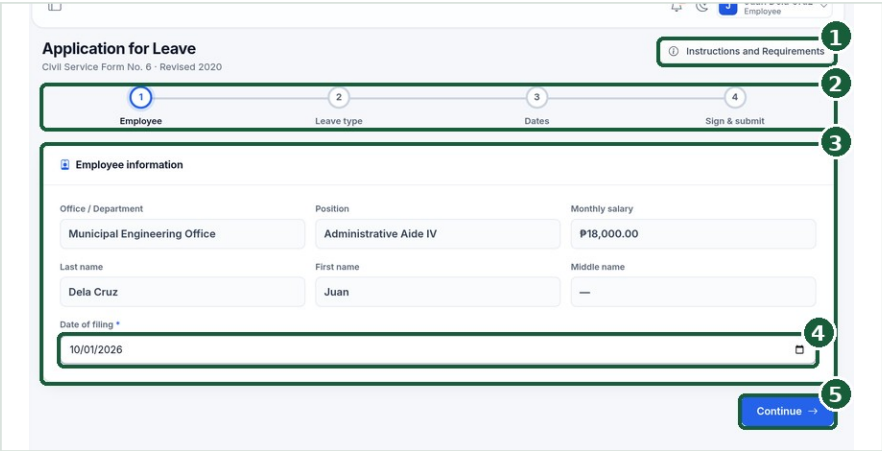

TIP You are signed out automatically after 30 minutes without activity. Always click Sign out when you leave the computer.

EMPLOYEE Part 7

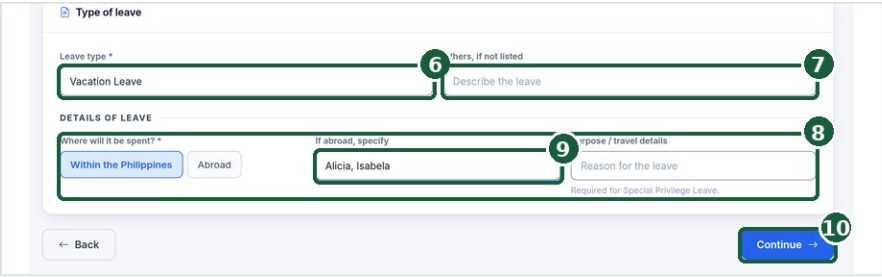

Applying for Leave (Steps 1–2)

Apply for Leave opens the digital CSC Form No. 6 in four steps.

A Step 1 — Your details

B Step 2 — Type of leave

POLICY · ALL USERS Part 20

Policy: Acceptable Use

13 Rules for every user

1. Use the system for **official LGU business only**.
2. Use only **your own account**. Never share your password or one-time code.
3. Open only the records your role needs for your work.
4. Attach only **genuine documents**. False medical certificates or forms are an offense.
5. Use only **registered LGU computers** on the LGU network.
6. Never test, probe or attack the system, or type code or scripts into its fields.
7. Sign out or lock the computer when you step away. Keep printed forms safe.
8. Report lost passwords, suspicious messages and security problems at once.

14 Monitoring

Use of the system is recorded. The System Administrator reviews sign-ins, actions and security alerts to protect the system.

15 Violations

A violation may lead to a blocked account, an administrative case under CSC rules, and liability under RA 10173 and RA 10175.

16 Review

This policy is reviewed every year, and whenever the system or the law changes.

ACKNOWLEDGMENT

I have read and understood this Privacy and Acceptable Use Policy, and I agree to follow it.

Name _____

Signature _____

Office _____

Date _____

POLICY · ALL USERS Part 20

Policy: Your Privacy Rights

10 Your rights under the Data Privacy Act

1. **Be informed** of how your information is used. This policy does that.
2. **Access** your information. See **My Leave Requests** and **My Audit Log**, or ask HR for a copy.
3. **Correct** wrong information. Ask HR to fix your employee record or credits.
4. **Object** to processing that no law or duty requires.
5. **Erasure or blocking** of information that is wrong, outdated or unlawfully kept. Records the law requires cannot be erased on request.
6. **Data portability**: receive a copy of your information.
7. **Damages** for harm caused by misuse of your information.
8. **File a complaint** with the National Privacy Commission.

11 Data Protection Officer

The Municipal Mayor designates the LGU's Data Protection Officer. Send privacy requests and complaints to the DPO through the HR Office.

12 Personal data breach

If you think information has been lost, stolen or seen by someone who should not see it, **report it at once** to the System Administrator and the DPO. When required, the LGU notifies the National Privacy Commission and the persons affected within **72 hours** of learning of it.

07 Applying for Leave (Steps 1–2)

WHAT EACH NUMBER MEANS

A Step 1 — Your details

1. Opens the CSC instructions and the documents each leave type needs.
2. Shows the current step of the form.
3. Office, position, salary and name come from your employee record.
4. Check the date of filing.
5. Click Continue.

B Step 2 — Type of leave

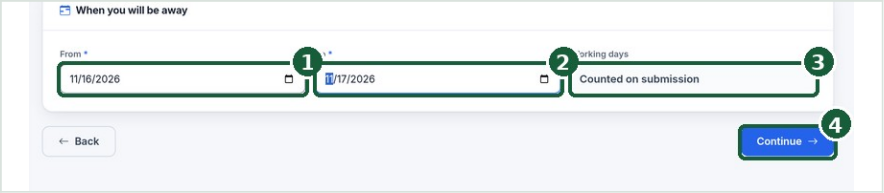

6. Select the leave type.
7. Describe a leave that is not in the list.
8. Answer the details asked for the chosen type.
9. Type the place. Required for Vacation Leave, even within the Philippines.
10. Click Continue.

EMPLOYEE Part 8

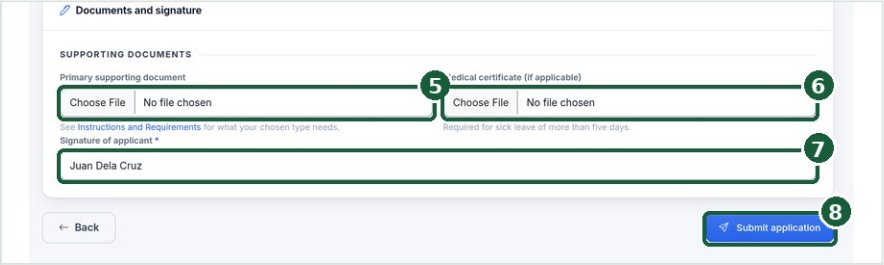

Applying for Leave (Steps 3–4)

Choose the dates, attach the requirements and submit.

A Step 3 — Dates

B Step 4 — Attachments and submit

POLICY · ALL USERS Part 20

Policy: Access and Protection

7 Who can see your information

Role	Can see
Employee	Only your own record, applications, credits and audit log.
Department Head	Applications filed by employees of the office you head.
HR	All applications, employee records including salary, and leave credits.
Municipal Mayor	All applications and leave reports.
System Administrator	User accounts and security records. Does not decide leave.

8 How it is protected

- Kept on the LGU's own server, on the local network only. Nothing is stored in the cloud.
- Every connection is encrypted (HTTPS).
- Passwords are stored in a form no one can read, not even the System Administrator.
- Two-step sign-in, role-based access and registered computers only.
- Attacks are detected and blocked, and every important action is recorded in a log that cannot be edited.
- A backup is made every night and kept by IT.

9 How long it is kept

Leave records and attachments are kept for as long as government records rules require, then disposed of under the National Archives rules. Accounts of employees who leave are **archived, not erased**. One-time sign-in codes are deleted after one day.

POLICY · ALL USERS Part 20

Policy: Information We Collect

5 What the system collects, and why

Information	Examples	Used to
Employment record	Name, employee number, email, username, office, position, employment status, date hired, monthly salary	Identify you, fill in CSC Form No. 6 and compute leave
Personal details	Gender, civil status, birth date, contact number, address	Keep the employee record HR is required to maintain
Leave applications	Leave type, dates, place, purpose, illness for sick leave, decisions and remarks	Process leave under the CSC rules and update credits
Attachments and signature	Supporting documents, medical certificates, your signature image	Prove what a leave type requires and sign the printed form
Security records	Sign-ins, one-time codes, IP address, browser, registered computers, audit log	Protect the system and investigate incidents

6 How it may be used

- Only for managing leave and keeping the system secure.
- Never sold, and never used for any other purpose.
- Shared outside the LGU only when a law requires it, for example with the CSC, the Commission on Audit or a court.
- Collect only what a leave application needs. Do not upload documents it does not ask for.

08 Applying for Leave (Steps 3–4)

WHAT EACH NUMBER MEANS

A Step 3 — Dates

1. First day of leave.
2. Last day of leave.
3. Working days are counted for you; weekends and holidays are skipped.
4. Click Continue.

B Step 4 — Attachments and submit

5. The main supporting document (PDF, JPG or PNG, up to 5 MB).
6. A medical certificate, if your leave needs one.
7. Check your typed signature.
8. Click Submit application. The status becomes Pending.

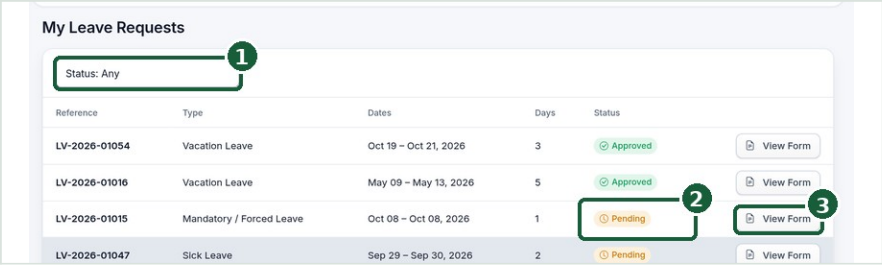

> **TIP** If the form will not submit, a red summary at the top lists every field to fix.

EMPLOYEE Part 9

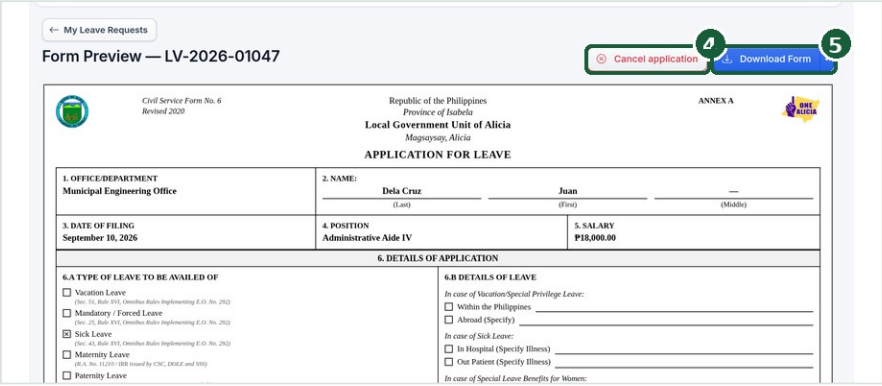

Tracking Your Applications

My Leave Requests lists everything you have filed.

A My Leave Requests

B Inside an application

POLICY · ALL USERS Part 20

Privacy and Acceptable Use Policy

STATUS **Proposed** for the Local Government Unit of Alicia. It takes effect once approved by the Municipal Mayor.

1 Purpose

This policy states how the Leave Management System (LMS) collects, uses and protects personal information, and the rules every user must follow when using it.

2 Scope

It applies to every person with an LMS account: employees, Department Heads, HR, the Municipal Mayor and the System Administrator, and to all records the system holds, on screen, printed or backed up.

3 Legal basis

- Republic Act No. 10173, the **Data Privacy Act of 2012**, and its Implementing Rules and Regulations
- NPC Circular No. 16-01, Security of Personal Data in Government Agencies
- Republic Act No. 10175, the **Cybercrime Prevention Act of 2012**
- The Civil Service Commission (CSC) **Omnibus Rules on Leave**
- Republic Act No. 9470, the **National Archives of the Philippines Act of 2007**

4 Definitions

Term	Meaning
Personal information	Any information that identifies a person, such as a name, employee number or address.
Sensitive personal information	Includes health (such as an illness or medical certificate), age, civil status and government-issued numbers.
Data subject	The person the information is about: you.
Data Protection Officer (DPO)	The LGU official who handles privacy requests and complaints.

ALL USERS Part 19

Keeping Your Account Safe

Most attacks start with a shared password or an unlocked computer.

Passwords

- At least **12 characters**, with upper- and lowercase letters, a number and a symbol.
- Change the first-time password at your first sign-in.
- Never share it. HR and the System Administrator never need it; they can reset it.

One-time codes

- A code works **once** and expires after **5 minutes**.
- Never give your code to anyone.
- A code you did not ask for means someone may know your password: change it and tell the System Administrator.

At your computer

- Click **Sign out** when you leave; do not just close the tab.
- Lock the computer with **Windows key + L**.
- Do not type code or scripts into fields. They are recorded as attacks and may block your computer.

Personal information

- Leave forms and medical certificates are personal data.
- Upload only the documents the application needs.
- Do not share screenshots of other employees' records.

GOOD TO KNOW Review your own sign-ins and actions any time in **My Audit Log**. If something there is not yours, tell the System Administrator.

09 Tracking Your Applications

WHAT EACH NUMBER MEANS

A My Leave Requests

1. Filter by status.
2. Pending, Returned, Approved, Disapproved or Cancelled.
3. View Form opens the application.

B Inside an application

4. Cancel application, while it is Pending or Returned.
5. Download Form prints CSC Form No. 6; the arrow picks the paper size.

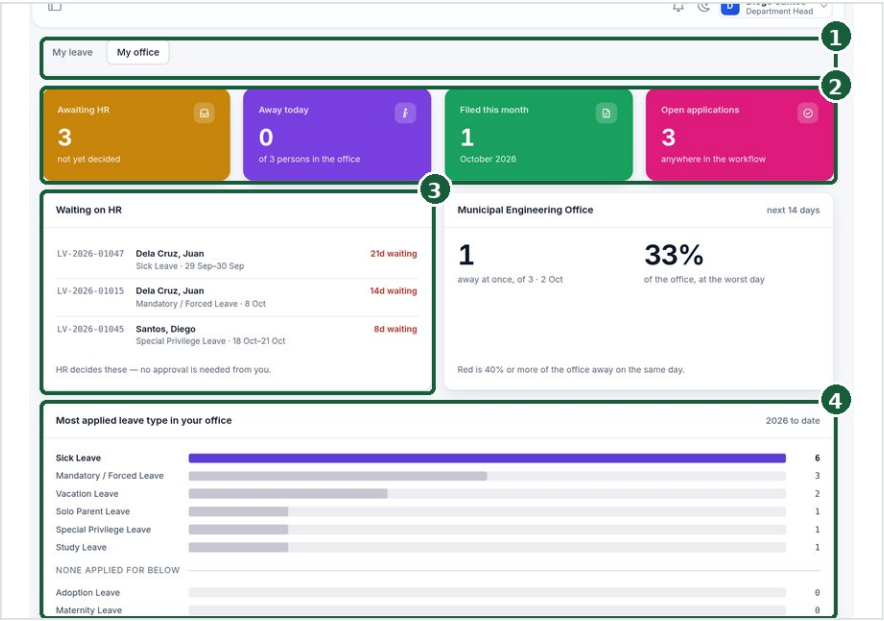

TIP There is no edit button. To change a Pending application, cancel it and file a new one.

DEPARTMENT HEAD Part 10

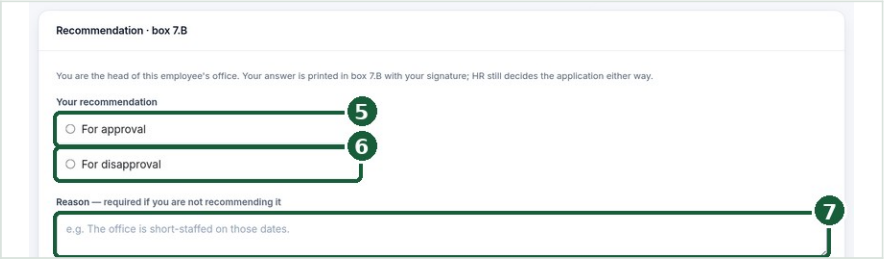

Office Leave & Box 7.B

You are notified when someone in your office files leave. You may record one recommendation; HR still decides.

A My office

B Recommendation

18 Audit Logs & Settings

WHAT EACH NUMBER MEANS

A Audit Logs

1	Search by user.
2	Filter by action.
3	What changed, with old and new values.

B System Settings

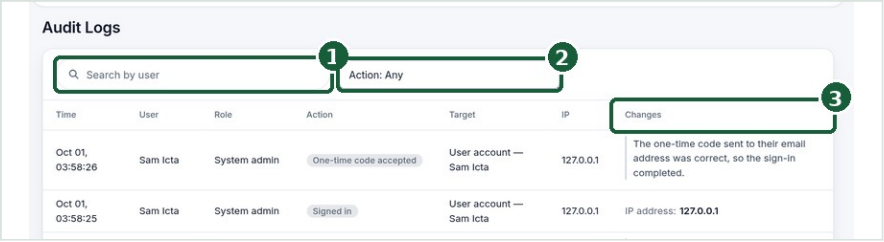

4	Wrong passwords allowed before an account is blocked. Click Save settings when done.
5	Require the emailed one-time code at sign-in.
6	On/off switch.

SYSTEM ADMINISTRATOR Part 18

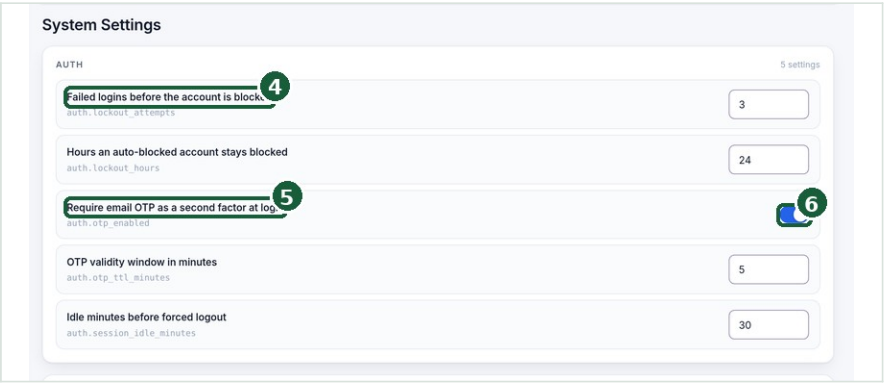

Audit Logs & Settings

Every important action is recorded. Settings control sign-in security.

A Audit Logs

B System Settings

10 Office Leave & Box 7.B

WHAT EACH NUMBER MEANS

A My office

1. Open the My office tab.
2. Leave figures for the office you head.
3. Applications still waiting on HR. Click one to open it.
4. Most applied leave type in your office.

B Recommendation

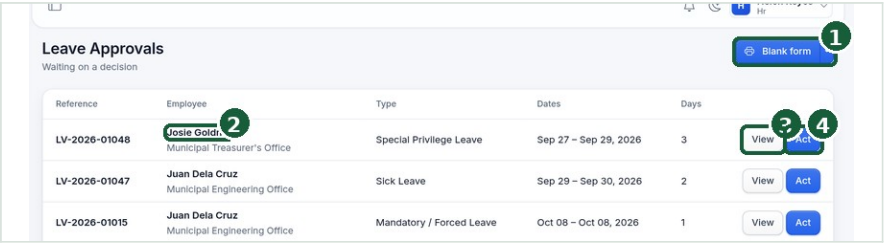

5. For approval.
6. For disapproval.
7. Reason (required for disapproval), then Record recommendation.

HR Part 11

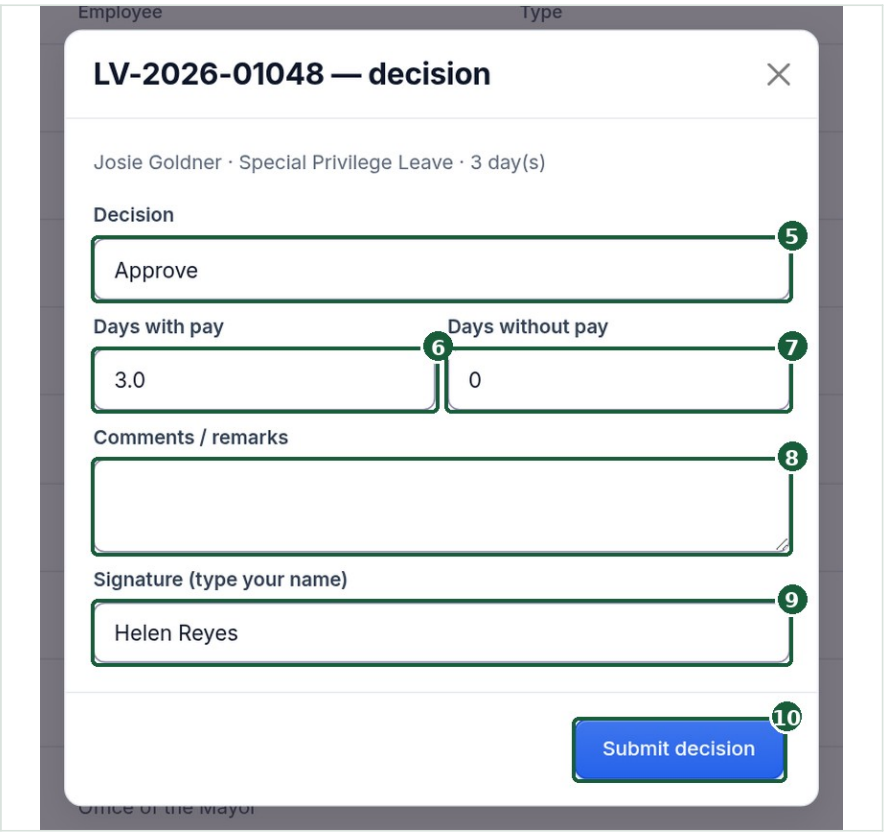

Deciding Leave Applications

HR approves leave in a single step. Leave Approvals lists every application that is waiting.

A Leave Approvals

B Decision window

17 User Accounts

WHAT EACH NUMBER MEANS

A Users

1	Click New user.
2	Search by name, email or username.
3	Filter by status.
4	Current, archived or all accounts.
5	Edit details and roles.
6	More: access, history, reset password, block, deactivate, archive.

B New user

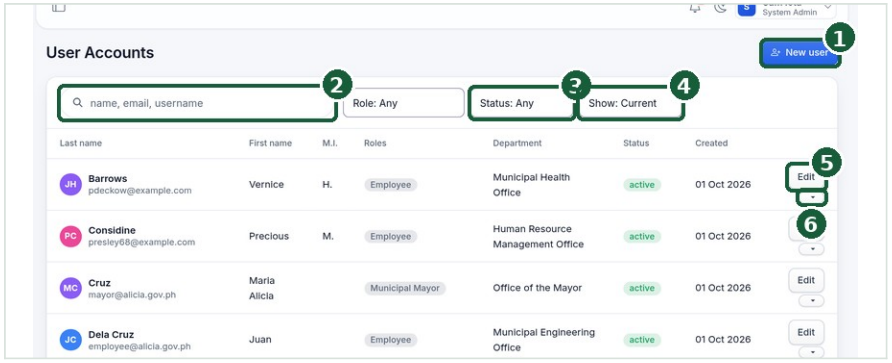

7	Full name, email and username.
8	Tick at least one role.
9	Personal and employment details.
10	Click Create user. Give the first-time password privately.

SYSTEM ADMINISTRATOR Part 17

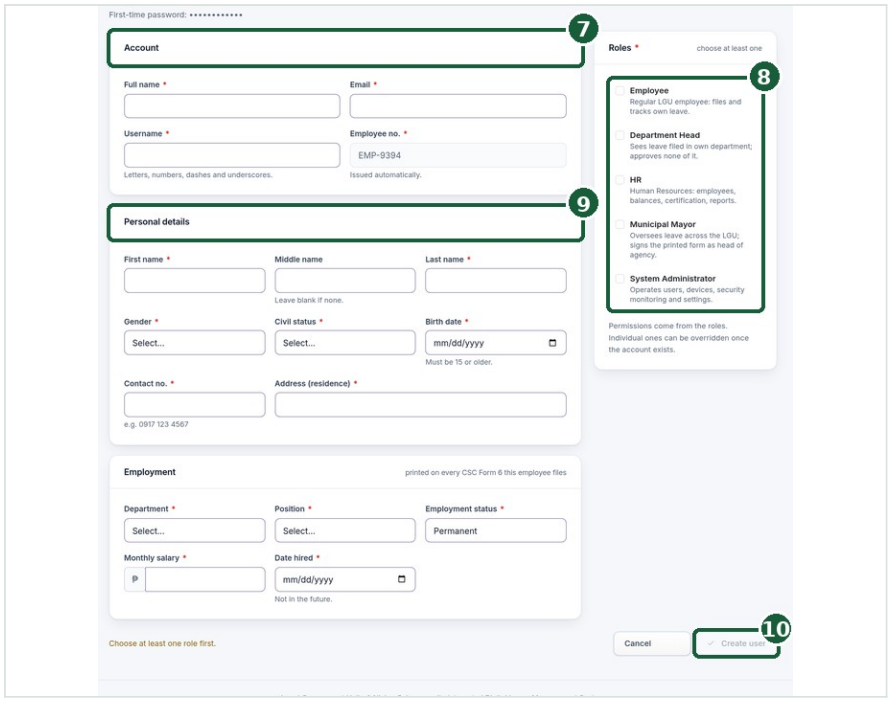

User Accounts

Create accounts, assign one of the five roles and manage access.

A Users

B New user

11 Deciding Leave Applications

WHAT EACH NUMBER MEANS

A Leave Approvals

1	Blank form prints an empty CSC Form No. 6.
2	Click the employee to open the application.
3	View opens the application.
4	Act opens the decision window.

B Decision window

5	Approve, Return for revision, or Disapprove.
6	Days with pay.
7	Days without pay.
8	Comments (the reason, for a disapproval).
9	Your typed signature.
10	Click Submit decision.

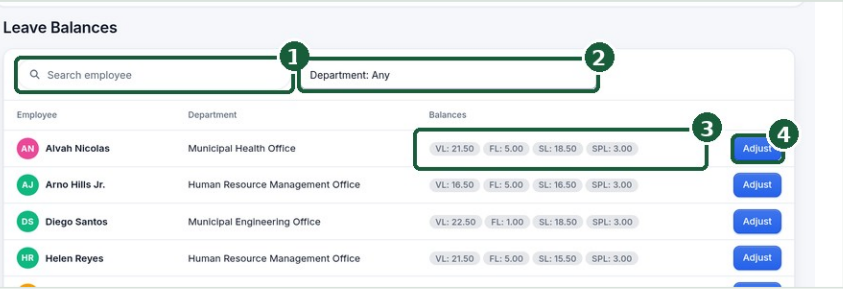

TIP Approving deducts the credits of a deductible leave and notifies the employee.

HR Part 12

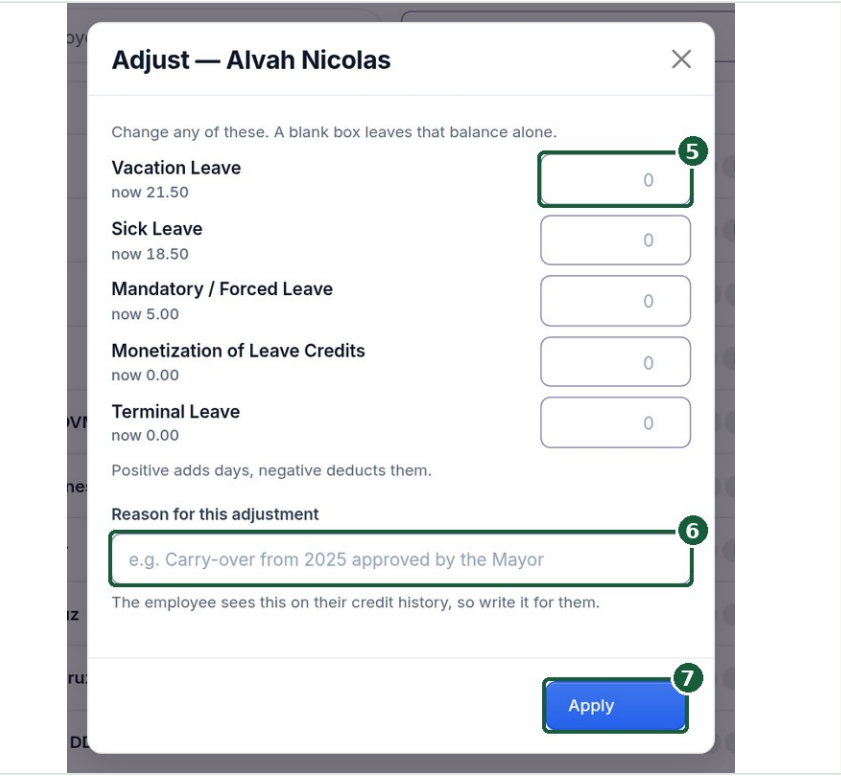

Leave Credits

Leave Balances shows every employee's credits. Credits are added monthly by the system.

A Leave Balances

B Adjust credits

16 Intrusion Logs & Blocked IPs

WHAT EACH NUMBER MEANS

A Intrusion Logs

1	Search by IP address.
2	Filter by category (SQLi, XSS, Traversal, Rate, Privilege…).
3	Filter by severity.
4	Where the request came from.
5	The rule that was matched.

B Blocked IPs

6	Block an address by hand, with a reason and duration.
7	Addresses seen attacking in the last 7 days.
8	Block that address for 24 hours.
9	Filter blocks by source.
10	Lift block unblocks the address.

SYSTEM ADMINISTRATOR Part 16

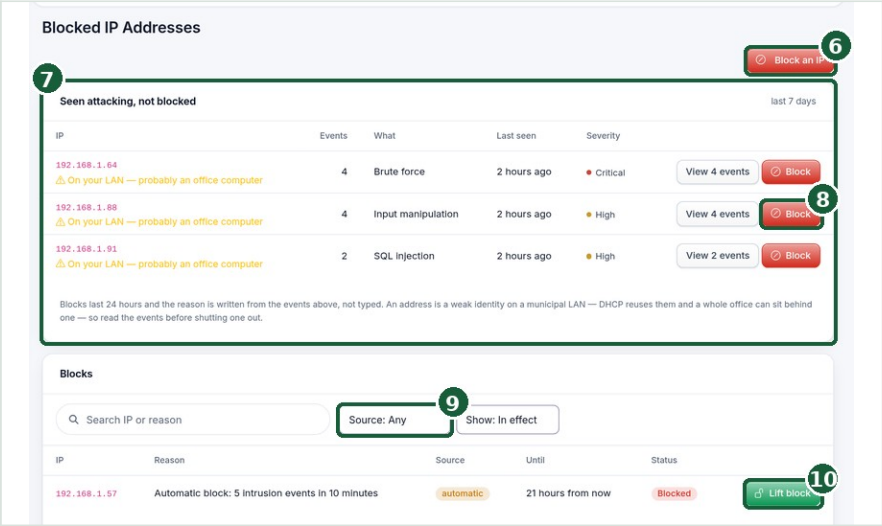

Intrusion Logs & Blocked IPs

Every suspicious request is logged. Repeated attacks block the address automatically for 24 hours.

A Intrusion Logs

B Blocked IPs

12 Leave Credits

WHAT EACH NUMBER MEANS

A Leave Balances

1. Search for an employee.
2. Filter by department.
3. Credits per leave type.
4. Click Adjust.

B Adjust credits

5. Days to add, or a negative number to deduct.
6. Reason for the adjustment (required).
7. Click Apply.

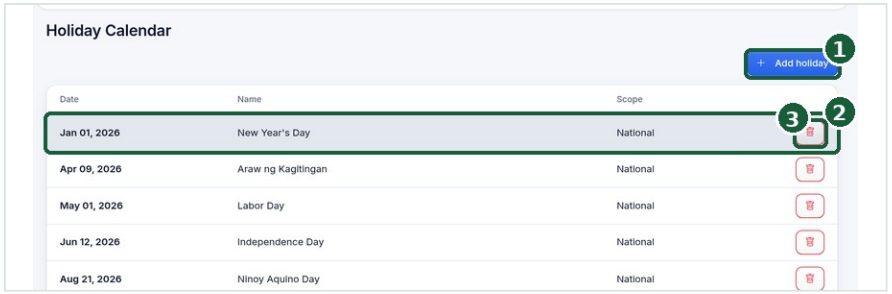

> **TIP** A balance never goes below zero. Every adjustment appears in the employee's credit history.

HR Part 13

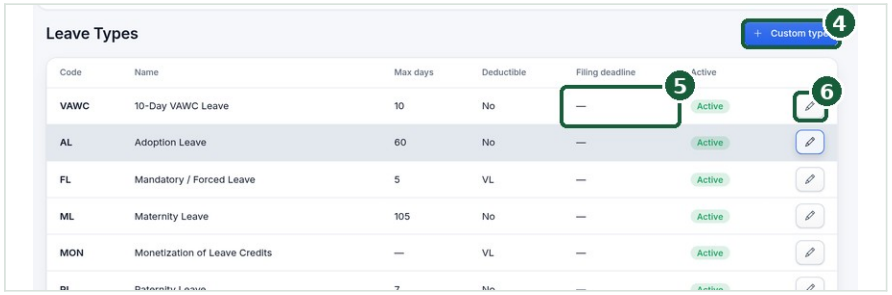

Holidays & Leave Types

The holiday calendar decides which days count as working days. Leave types hold the rules of each leave.

A Holiday Calendar

B Leave Types

15 Security Dashboard

WHAT EACH NUMBER MEANS

A Security Dashboard

1	Accounts, failed sign-ins today, intrusions this week, blocked addresses.
2	Attack severity: Critical, High, Medium.
3	Intrusion attempts per day.
4	Recent alerts.
5	Attempts by type, last 30 days.
6	Failed sign-ins by reason, last 7 days.
7	Unreviewed events. ✓ marks one as reviewed.
8	Role, permission and settings changes.

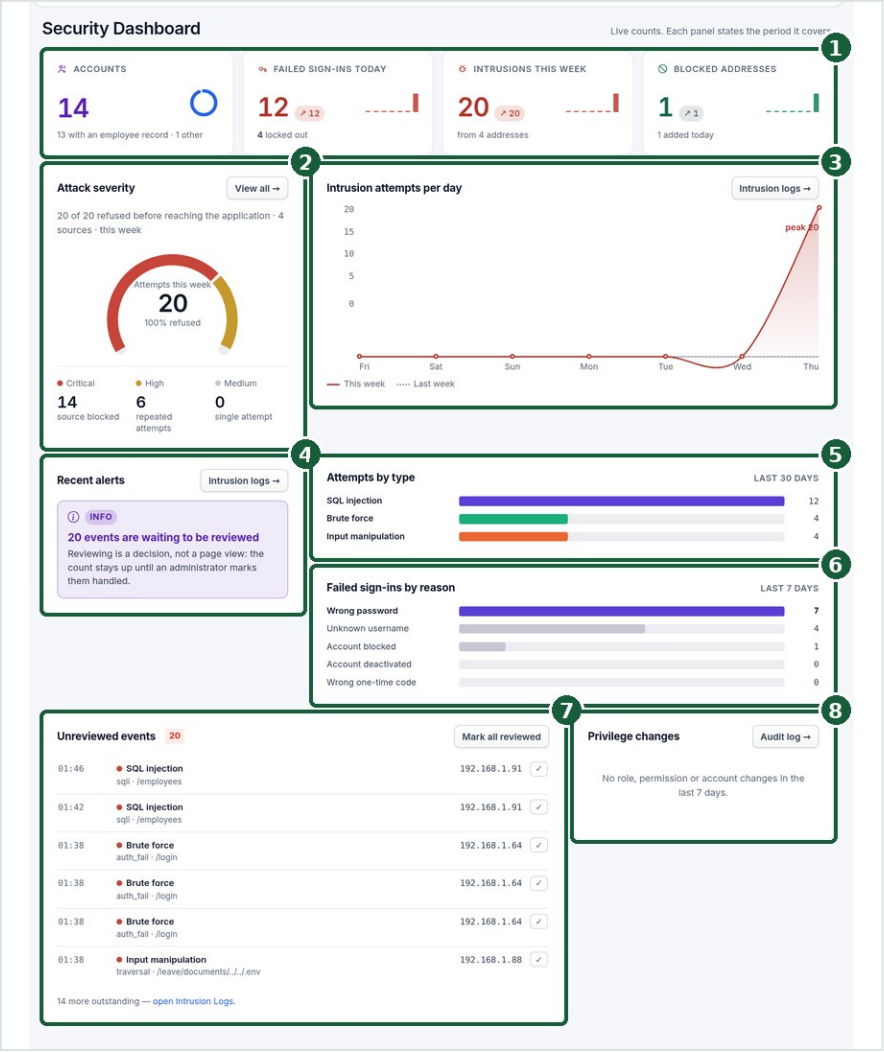

TIP While you are signed in, a new intrusion event pops up an Intrusion alert. Automatic IP blocks and account lockouts are also emailed.

SYSTEM ADMINISTRATOR Part 15

Security Dashboard
